COMPLEX™

breathable
camouflage
and concealer

Improve your skin and look flawless

Cover and Re- covery

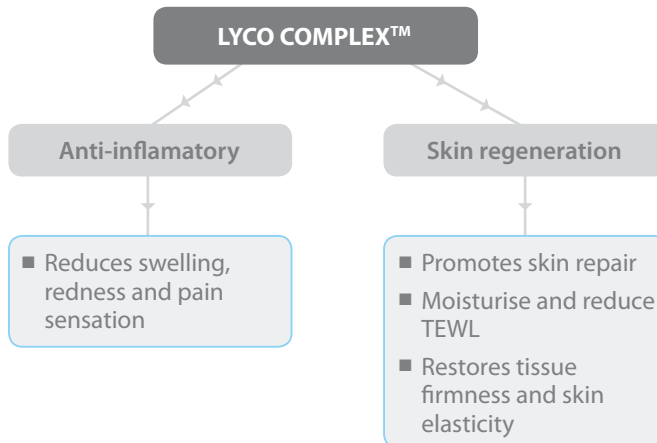

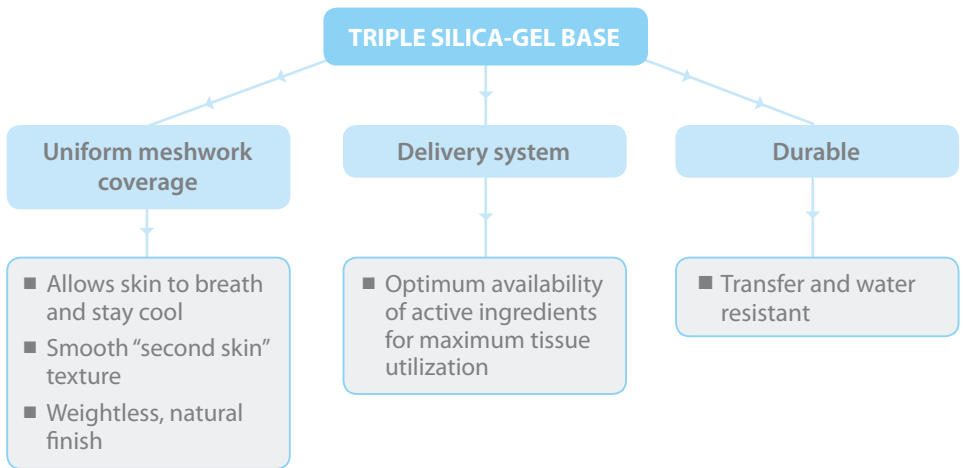

The first breathable colour corrective treatment that combines cosmetic and skincare technology to promote post procedure healing, soothe sensitive skin, rejuvenate and camouflage at the same time.

Did you know...

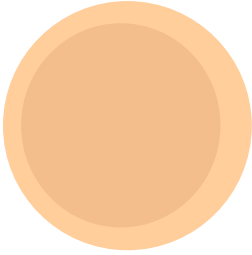

Breathable Camouflage and Concealer were originally developed to be used by doctors immediately after most cosmetic procedures to camouflage the signs of their intervention and promote a quick and comfortable recovery. Since then the benefits of our unique formula have been discovered by many and found suitable for use as an everyday, skin improving camouflage.

next generation technology

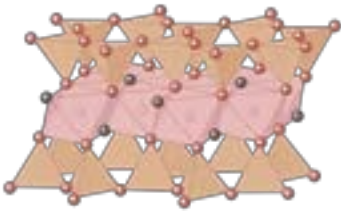

Lycogel® 's revolutionary and unique technology combines a breathable Triple Silica Gel Base with LYCO-Complex™, a carefully balanced set of bio-active agents that work synergistically to improve the skin.

the difference

Traditional mineral oil and water based cosmetics suffocate your skin by clogging pores and preventing airflow to take place.

Mineral crystals, under magnification, look like overlapping fish scales which barely allow the skin to breath.

Triple silica gel technology forms the unique “breathable” matrix contained in our formula. The chemical structure of the matrix causes it to be attracted to the surface of the skin so that it stays in place, providing a base to suspend fine particles like colour pigments and physical sunscreens. Under magnification, the matrix appears as a breathable meshwork to allow air, moisture and ingredients to reach the skin - it’s like wearing a “second skin”.

post procedure before and after

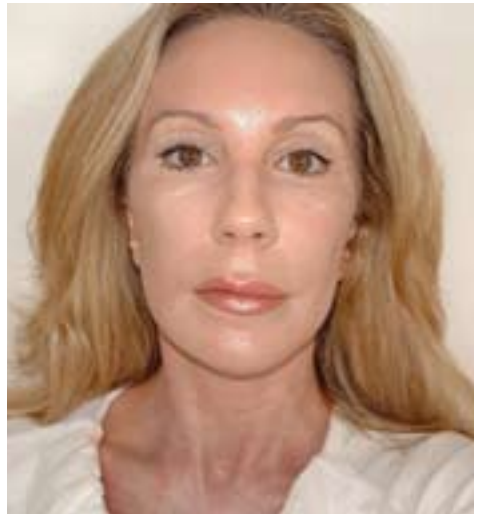

With today's face paced lifestyle, you need to resume your normal life in the shortest possible time - without the tell tale signs of a specialist's intervention. Breathable Camouflage and Concealer can be applied immediately post procedure and will counteract heat sensation, reduce swelling and will camouflage any bruising and or redness.

Safe to use immediately after:

- Fractional Laser Skin Resurfacing, Laser Skin Peels, P.D.T.& IPL
- Post Cosmetic Surgery, Hair Transplant Surgery and Scar Revision
- Tattoo Removal and Vascular Treatments
- Cosmetic Injections
- Chemical and Mechanical Peels
- Micro Needling Therapy

Once introduced to **Breathable Camouflage and Concealer** you will want to continue with it as your everyday foundation - it is simply that good.

Before

After

breathable camouflage 20ml

Undetectable coverage that lasts all day! Breathable Camouflage is available in 10 shades. It can be mixed and applied in buildable layers to create a custom coverage that looks natural and feels like you have nothing on. You will feel it improving your skin while you look flawless. Breathable Camouflage is water resistant for up to 90 minutes of swimming, transfer resistant and will keep your face protected with non-paraben SPF 30.

breathable concealer 6ml

Breathable Concealer provides triple pigmentation for extra concentrated coverage which virtually erases imperfections. Breathable Concealer is available in four shades. A little goes a long way!

1

Suitable for immediate post procedure application

2

Promotes skin repair

3

Reduces pain and heat sensation

4

Proven non-irritating for sensitive skin types

The 10 reasons why skin specialists recommend **Lycogel**[®]

5

Non-comedogenic & hypo allergenic

6

Provides natural camouflage that lasts all day

7
